

Festival & Bannertrack

Flexible & Rigid Banner Support Systems

- **Festival banner poles turn the humble banner into a refined architectural feature.**

From shopping malls to exhibition halls; Festival can be seen supporting banners and attracting attention. Based on our successful Signpole 20 and 40 aluminium extrusions, Festival uses the minimum of components to maximum effect. Hanging or projecting; with plain or decorative moulded end caps;

Festival is easy to use and can co-ordinate beautifully with other Spandex sign systems.

- **BannerTrack is new, permanent solution to displaying temporary signs. From promotional banners to poster-sized prints.**

With its patented 'twist and fix' fasteners and unobtrusive aluminium profile, BannerTrack solves the problem of drooping banners once and for all. Banners and signs of virtually any length can be installed, removed or repositioned effortlessly. BannerTrack can be recessed or taken around corners and looks great as a contrasting décor line or custom finished to match an existing colour scheme.
