

Mainframe / Miniframe

Rigid Face Signbox / Trim System

Illuminated
signboxes

Functional sign
frames

Single or
double-sided

Wall-mounted
or projecting

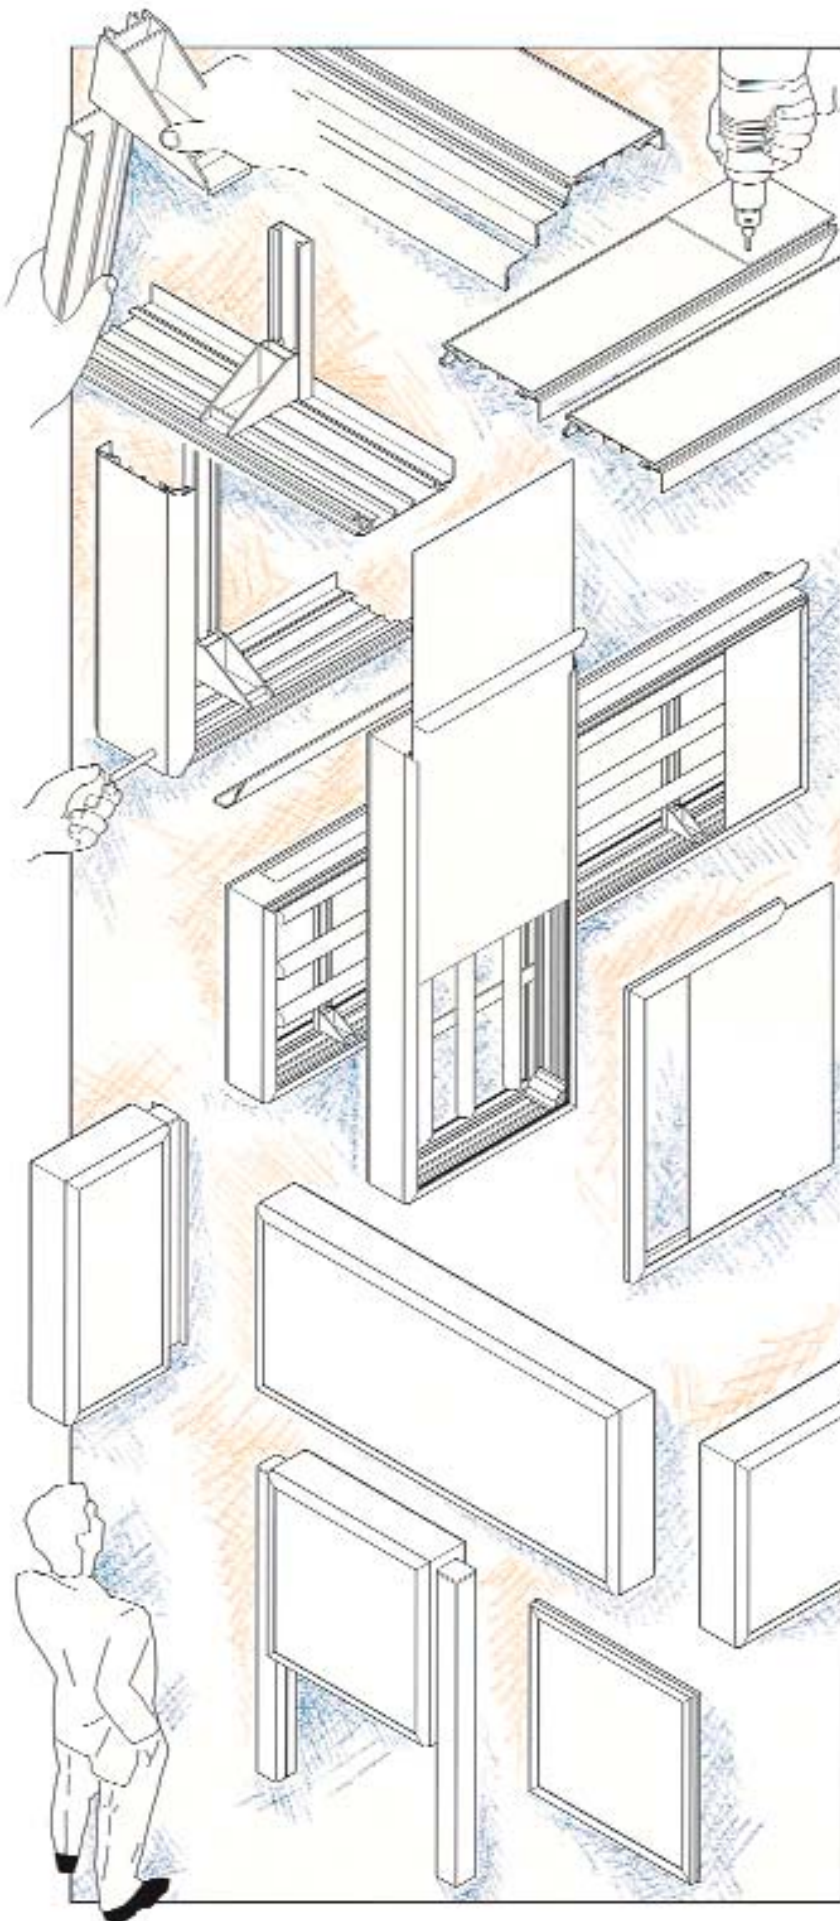

The Mainframe signbox system makes the perfect fascia signbox. This versatile system accepts rigid acrylic face material from 3mm to 6mm, which can be stencil cut or decorated with translucent films.

Mainframe's design allows easy access to electrical fittings for problem free maintenance.

Square section or curved edges; single or double-sided; wall-mounted or projecting; fixed direct or on stand-off brackets; the choice is yours with Mainframe. With its non-illuminated counterpart, Miniframe; you won't find a better way to produce illuminated signboxes or non-illuminated sign frames.
